

The Red River Valley School Division (RRVSD) operates a fleet of buses for student transportation, and those buses require the use of hydro electricity during the winter months to maintain a warm battery. RRVSD does not have the electrical capacity to allow for all buses to be plugged into divisional buildings, and therefore relies on the bus drivers to plug in the buses at their personal residence.

Reimbursement to the bus drivers will be calculated by the Transportation Department on an annual basis using the following criteria:

1. Number of school days that the bus was plugged in at the employee's residence between November 1 - Spring Break of each year multiplied by:
2. 15 hours per day of plug in time multiplied by:
3. The Kw/hr rate as determined by the Transportation Department.

Payment will be made to the bus drivers in April of each school year.
