

Red River Valley School Division ADMINISTRATIVE PROCEDURE C3 - FIRST AID TRAINING

The Red River Valley School Division Board of Trustees believes that adequate numbers of staff members must be trained in First Aid and CPR.

The numbers of personnel trained in First Aid and CPR will comply with all provincial regulations at a minimum.

Responsibility for compliance will be as follows:

- For Schools, it will be the responsibility of the School Administrator.
- For Bus Garages, it will be the responsibility of the Transportation Supervisor.
- For the Administration Office, it will be the responsibility of the Maintenance Supervisor.
- For Bus Drivers, it will be the responsibility of the Transportation Supervisor.

The number of First Aiders required is based on workplace distance from a medical facility. By this definition, all RRVSD buildings fall into the definition of “Close Workplace” (less than 30 minutes to a medical facility).

In a Close Workplace, First Aid Requirements are as follows:

Number of workers per shift	Low Hazard Work	Other work
1 to 10	FA1	
11 to 40	FA1*	FA2*
41 to 100	FA1	2 FA2's*
101 to 199	2 FA1's*	2 FA2's*
200 or more	3 FA1's*	3 FA2's*

Most sites in The Red River Valley School Division fall in the Low Hazard Work category and no site would have over 200 workers at all time. (Note that workers include all RRVSD employees and students working in Industrial Arts classes and Technical Vocational Classes.)

A list of certified first aiders, including the expiration of their first aid training, will be posted in each location within Red River Valley School Division.

- * FA1 – Emergency First Aid with CPR Level C and AED
- * FA2 - Standard First Aid with CPR Level C and AED

See [Procedure I5 – Bus Driver First Aid Training](#) for more information.
