

Strategic Planning

One of the most important roles of the Red River Valley School Board (Board) is to develop a strategic plan to achieve the mission and vision for the division. The plan includes long term goals and strategic priorities.

Strategic Priorities

The current strategic priorities for the Red River Valley School Division are directly linked in the Board Strategic Plan.

Specific strategies are identified for the achievement of each priority as well as indicators to monitor success. Once approved the priorities, specific strategies and success indicators are posted on the division website, with the status updated at least annually.

Planning and Accomplishment Reporting to the Board and Public

The Board conducts annual planning sessions¹ in order to provide Trustees and Senior Administration opportunities for discussion and study of issues relative to the organization and administration of the division for the purpose of reviewing and revising strategic priorities. In doing so, the Board considers input from Trustees, Senior Administration and any other persons and groups as may be consulted by the Board.

The strategic priorities direct the development of an annual plan prepared by Senior Administration identifying specific activities designed to achieve the strategic priorities established by the Board. The plan is reviewed and approved annually by the Board and forms the basis for budget preparation. The Board commits itself to an open and candid progress reporting of achievements in its goals and objectives. This includes reporting against the specific success indicators for each strategic priority.

Senior Administration provides the Board with monthly monitoring reports that include results of student, staff, and Board priorities. This information is used to make ongoing policy and planning decisions and to keep the public informed about school needs and results generated from the public support of school programs.
